

STOCK MATERIAL FOR CONTAINER BODY OF
INSULATING PAPER CONTAINER, INSULATING PAPER
CONTAINER AND PROCESS FOR MAKING THEM

ABSTRACT OF THE DISCLOSURE

An insulating paper container's body has a low m.p. thermoplastic synthetic resin film laminated on its outer wall surface and a compatibly expansile ink applied to the outer surface either as a primer or as indicia to provide stock material improved in its printability for bar
5 codes or the like as well as in its insulating property. In addition there is provided a process for making such stock material.
